Labor Shed Analysis

A labor shed analysis is defined as where workers work and where workers live relative to a user-defined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

OnTheMap, Census Bureau

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Department of Economic Opportunity to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER)

The Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER), produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

Executive Summary

The analysis of workforce and demographic characteristics, including commuting patterns of Nassau County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for Nassau County.

Workers employed in Nassau County are clustered in the Accommodation and Food Services (20.4%), and Retail Trade (12.7%) industries. Workers living in Nassau County are concentrated in the Accommodation and Food Services (12.3%), and Health Care and Social Assistance (11.7%) industries.

A detailed examination of commuting patterns for Nassau County shows that the county has a net outflow of -12,864 workers. Using the latest annual Census data available, there were 22,023 workers employed in Nassau County and 34,887 workers living in Nassau County. Of the workers who lived in the county, 22,393 workers (64.2%) were employed outside the county.

With 64.2% of workers who reside in Nassau County employed outside the county, Nassau County was ranked 29 of 67 for the highest outflow rankings among Florida counties. Leon County (20.7%) had the highest outflow rate, followed by Miami-Dade County (21.4%) and Duval County (24.9%). Glades County (84.2%), Jefferson County (81.7%), and Gilchrist County (80.0%) had the lowest worker outflow rates.

Of the 22,393 Nassau County workers employed outside the county, the top destination counties are Duval County (14,643 workers), Orange County (845 workers), and Clay County (806 workers). Of the 9,529 Nassau County workers living outside the county, the top origin counties are Duval County (4,322 workers), Camden County (1,098 workers), and Clay County (497 workers).
