

April 9, 2024

Mr. Paul O'Connell
Vice President, Real Estate Development
Michigan Economic Development Corporation
300 N. Washinton Square
Lansing, MI 48913

Dear Mr. O'Connell:

On behalf of Thomas Township, I would like to express support for the Great Lakes Tech Park (GLTP) being included in the MI Sites Program. Thomas Township has worked closely with the Saginaw County Economic Development Corporation and Saginaw Future over the past decade to develop and market this site to prospective users. Entry into this program will further enhance GLTP's exposure and help reach our goal of completing its development.

GLTP has two existing companies, Fullerton Tool and Saginaw Control and Engineering (SCE). SCE has already expanded its footprint and has the potential for further growth. However, GLTP still has 114 acres of available land and is well positioned to capitalize on Corning's upcoming Solar Technology LLC project.

I also want to confirm that the site is appropriately zoned for light industrial use under the township's Great Lakes Tech Park Overlay Zone. This special overlay district was created to foster GLTP's development.

Thank you for your consideration and please do not hesitate to reach out with any questions. Thomas Township is excited about the opportunity to have GLTP included in the state's site portfolio.

Sincerely,

Russ Taylor
Township Manager
